

Excellence in Metal Packaging

Seamless (Two-Piece) Cans

Why seamless?

Seamless cans are extra versatile and flexible, making them the perfect package for food, cosmetics, candles, candy, toys, games and so much more. Our superior-quality seamless tins have no seams which means no leaks. They are available in an array of sizes and shapes and offer many closure possibilities.

What is the best end, closure or lid to safeguard your product?

Are you concerned about freshness, shelf-life or product stability? How about damage in shipping and handling? We can help you address all of those concerns and more. Our lids, ends and closures offer flexibility and stability, while also ensuring your product is protected and can withstand the unpredictability of shipping and handling.

Multiple Lid Options:

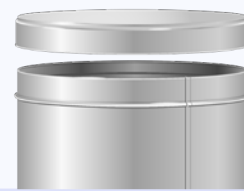

Multi-Friction for products such as paint, oils and wax

Interior Friction lid perfect for teas and spices

Screw on lid

Slip-on or snap-on lid

Does your product depend on freshness?

Whether you are selling coffee, spices, nuts or cosmetics, keeping your product fresh and contained is critical for your customer. With our hermetic packaging and seals, you can rest assured a perfect airtight seal will protect your contents during shipping, on-shelf, and in storage.

Top Lid

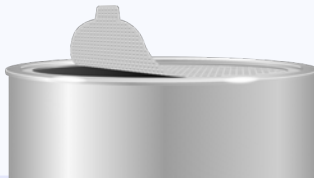

Bottom

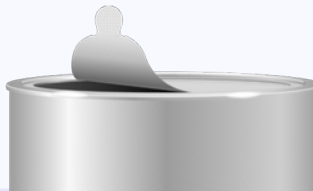

Maximize your branding.

The end, lid or closure you choose can be plain, color coated or printed. We can help you create a truly unique branding application that sets your product apart from your competition.

Hermetic Easy Open Ends/Seals (EZO):

EZO seal with tab pull

EZO seal with valve

Pull tab seal

Need a hinged lid? A slider, see through, snap on or screw on top?

Looking for something truly unique?

Never settle for mediocre! We're here to help you find the perfect metal packaging for your product. Whether launching a new item, celebrating a special anniversary or simply looking to stand out in a crowded field, customizable tins that distinguish your brand by complementing your product with exceptional design and graphics is only a phone call away.

Decorating on Metal

Printing on metal is an artform.

Partnering with Ohio Art, we offer state-of-the-art metal lithography options that are second to none. The goal of the print operators is to provide beautiful color reproduction protected to withstand the rigors of stamping and fabrication of metal packaging.

Whether it's a simple 1- or 2-color job or a more sophisticated CMYK job with multiple PMS add-ons, the team at Ohio Art has mastered the fine art of metal decorating and has over 36 international quality awards to prove it. Call us today to find out more.

Exquisite color effects for depth and dimension

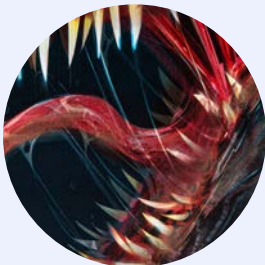

Special effects; matte, gloss and spot options

High-definition color reproduction

Embossing and debossing capable

Photographic quality, 2400 dpi standard

Full-color saturation

Why metal?

Metal recycles forever. Over 75% of all the metal ever produced in the world is still in circulation today. Metal truly defines the circular economy.

At Allstate Can, being a responsible global citizen means taking our environmental stewardship seriously. Our product is the most versatile of the sustainable packaging forms. In addition to being 100% recyclable, metal product packaging rates as 100% biodegradable in a landfill.

100%

- **Recyclable**
- **Renewable**
- **Biodegradable in a landfill**

Sustainability by the numbers

100%

Steel products can be recycled repeatedly (100% of the time) without loss of strength.

95%

More than 95% of the water used for making steel in North America is recycled.

80 million

More than 80 million tons of steel are recycled each year in North America.

18 million

Recycling steel saves the equivalent energy to power about 18 million households for a year.

24,000

Steel food cans are the most recycled food package. 24,000 community recycling programs in North America collect steel cans. Canned food is as nutritious as its fresh and frozen counterparts upon preparation. Canned goods do not contain preservatives!

69%

Almost 69% of all steel is recycled in North America each year—more than paper, aluminum, plastic and glass combined. North America's average steel recycling rate has been in excess of 60 percent since 1970.
